

FOLGAT AG is a provider of sapphire products for various applications

Sapphire is one of the most unique substances on earth. It is hard, strong and inert, with amazing optical properties and a high melting temperature - for thousands of applications in every industry.

FOLGAT AG has long-term strategic partnership with the leading crystal growers and sapphire manufacturers. We supply sapphire products of various sizes and shapes - existing designs and new ones - for the following markets:

Sapphire for various applications

- ➔ Optoelectronics
- ➔ Industrial Equipment
- ➔ Optical applications
- ➔ Medical applications

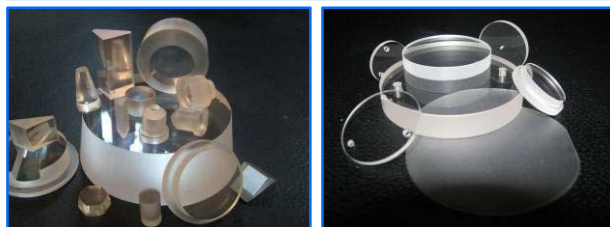

- ➔ Education & research
- ➔ Aerospace applications
- ➔ Military applications
- ➔ Watch industry

We offer high volume precision sapphire products, including **sapphire wafers**, **sapphire windows**, **prisms & lenses**, **sapphire substrates**, **watch glasses** and **sapphire boules**. All products are generated using the latest technology to maximize quality and transmittance.
